These may Borrelia burgdorferi, B. afzelli or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leat to Lyme disease.

These may Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leaves
                                                                                                                                                                                                                                                                                                                                                                                        Compositions of OspC polypeptides from strains of Borrelia which cause Lyme disease are used to immunize animals and detect immune responses to Lyme disease .

Chimeric
                                                                                                                                                                                                                                                                                              The present invention provides compositions comprising ospC protein chimeric ospC proteins from members of the Borrelia genus. These members of the Borrelia genus. These members is a facilia or B. garinii. These can be used vaccines against Borrelia infection, which is spread by ticks and to Lyme disease.

```

The present invention provides compositions comprising ospC proteins and chimeric ospC proteins from members of the Borrelia genus. These may be Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leads

These may be Borrelia burgdorferi, B. afzelli or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leads to Lyme disease.

Chimeric -
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The present invention provides compositions comprising ospC proteins chimeric ospC proteins from members of the Borrelia genus. These may Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leat to Lyme disease.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Compositions of \mathtt{OspC} polypeptides Lyme disease are used to immunize

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       밁
                                                                                                                                                                                                                                                                                                                                                                                       Chimeric - Chimeric -
                                                  The present invention provides compositions comprising ospC proteins chimeric ospC proteins from members of the Borrelia genus. These may Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as
                          vaccines against Borrelia infection, to Lyme disease.
